

George Midega

Data & Cloud Engineer · AWS Community Builder

Portfolio · LinkedIn · midegageorge2@gmail.com · +254 792 799 894 · Nairobi, Kenya

PROFILE

Data & Cloud Engineer with 3+ years across the full data lifecycle: building scalable ETL/ELT pipelines, provisioning cloud infrastructure as code on AWS, developing FastAPI microservices, modelling analytics datasets with dbt and Snowflake, and shipping production systems in healthtech and fintech. AWS Community Builder proficient in Python, SQL, Terraform, Airflow, and modern DevOps practices. Owns projects end to end, translates technical work into business value, and thrives in autonomous, small-team settings.

PROFESSIONAL EXPERIENCE

Data & Cloud Engineer, Shinrai Limited Technologies

Jun 2026 – Present · Nairobi, Kenya

- Engineered a production, serverless HRMS on AWS: FastAPI backend and Next.js frontend fronted by API Gateway/Lambda and Amplify, with Aurora PostgreSQL, Cognito auth, SES notifications, and KMS-backed field encryption.
- Authored the platform's infrastructure as code in Terraform (network, Aurora, Cognito, Amplify, SES, KMS, GuardDuty, cost governance) with GitHub OIDC CI/CD, contract tests, and 60+ versioned database migrations.
- Implemented data-protection controls (dynamic data masking, append-only audit, consent gating, and retention schedules) to meet privacy and compliance requirements.
- Designed the Procure-to-Pay / AP automation solution for a healthcare client: business requirements, solution architecture, OCR tooling evaluation, and an AI/ML feature catalogue for invoice extraction and reconciliation.

Data Engineer / Analyst, AgentsHub Kenya

Mar 2025 – Dec 2025 · Nairobi, Kenya

- Designed and maintained ETL pipelines with Python, SQL, and Airflow; reduced processing time by 40% and enabled daily automated reporting for 3 business units.
- Built and documented star-schema models in PostgreSQL; optimized queries and indexing for Tableau/Power BI dashboards serving 20+ users, improving load times by 60%.
- Developed dbt transformations following Kimball dimensional-modeling best practices; standardized metrics and implemented data-quality and governance checks.
- Monitored logs and performance metrics, resolved pipeline bottlenecks, and presented insights to senior leadership to inform strategic decisions.

Freelance Data Engineer / Consultant

Jan 2023 – Jun 2026 · Remote

- Built end-to-end ETL pipelines (Python, Airflow, AWS Glue) and cloud warehouses (Redshift, Snowflake, BigQuery) for healthcare and fintech clients, with ERDs, data dictionaries, and governance.
- Delivered 20+ Tableau/Power BI dashboards and FastAPI/Streamlit data products, including ML prototypes for risk stratification and behavioral forecasting.
- Managed AWS infrastructure with Terraform and containerized workloads with Docker for reproducible, scalable pipelines.

SKILLS

Cloud & Data Engineering: AWS (S3, Glue, Athena, RDS/Aurora, Lambda, API Gateway, Cognito, SES, KMS, CloudWatch, IAM), Snowflake, Terraform, Airflow, dbt, ETL/ELT, Data Modeling (Star/Dimensional), Docker, Kubernetes, CI/CD, Git.

Languages & Frameworks: Python, SQL (PostgreSQL, BigQuery, Redshift), FastAPI, Streamlit, Next.js/React.

Analytics & ML: Tableau, Power BI, Data-Quality Monitoring, Predictive Modeling (scikit-learn), LLMs / Agentic AI, A/B Testing.

CERTIFICATIONS

- | | |
|--|--|
| ✓ AWS Certified Solutions Architect – Associate (2026) | ✓ AWS Certified AI Practitioner (2026) |
| ✓ AWS Certified Cloud Practitioner (2025) | ✓ SnowPro Core Certification, Snowflake (2026) |

EDUCATION

BSc Microbiology & Biotechnology, University of Nairobi	Sep 2016 – Sep 2020
Second Class Honours (Upper Division).	

LEADERSHIP & COMMUNITY

AWS Community Builder	2026 – Present
Recognized contributor in the AWS technical community.	

ALX AWS Chatroom Ambassador, Kenya	Aug 2025 – Present
Mentor learners across data and cloud tracks through workshops on SQL, ETL, Airflow, dbt, and BI tools; support a community of 100+ learners.
